

Fistula needles

Features and benefits

Smooth and painless puncture

- Specially cut bevel design
- New dry siliconization method
- Ultrathin 95 μm wall

Optimal blood flow characteristics

- Sidehole on arterial needles
- Specially-designed Y connector

Simplified handling

- Rotatable colour-coded wings
- Colour-coded indication of the cannula position
- Luer connectors for easy and safe connection
- Soft anti-kinking PVC tubing and easy clamps

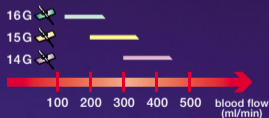

Packaging

- Inner box : 50 needles
- Outer box : 500 needles

Gamma sterilized

Gambro Plaster XL:

cellulose sponge expands rapidly in contact with fluids, resulting in immediate pressure on the wound. Can be removed easily when hemostasis has been achieved.

The size of the fistula needle must always suit the chosen blood flow.
